Note- For foals, use tail hair for sample. Fold form in thirds with hair sample inside

Directions: Wash hands, PULL 50-100 hairs from mane or tail, pulling 5-10 hairs at a time. Do Not use shed hair! Include only hairs with bulb/root ends (follicles) on hairs, align together with bulbs at one end, tape in middle of sample, as shown. Do Not tape over follicles. You may trim so sample fits on paper, keeping the follicle ends to submit as sample.
